## Your way to elasticity – SSM's latest application

**SSM will show their newest textile machines at ShanghaiTex for the first time. The exhibition is held in Shanghai from November 27 to 30, 2017 at the Shanghai New International Expo Centre. SSM welcomes the interested crowd at booth E1 A70 and E1 D30.**

The Swiss based SSM Schärer Schweiter Mettler AG, the inventor of the electronic yarn traverse system, announces their participation of the forthcoming ShanghaiTex on the booth of their agent Union Trading as well as on the booth of Rieter Components.

After the successful introduction of the XENO-platform in Asia in 2016, SSM has put the focus on the X-Series this year. With the latest application for cone-to-muff and muff-to-cone winding, SSM offers a highly flexible and economical system.

To maintain a high residual elasticity of elastic Polyamide (PA) and Polyester (PES) draw textured yarns (DTY) after dyeing, the muff dyeing process with integrated SSM leading yarn winding technology is the best solution. The new SSM PWX-CTM enables the preparation of low-density muffs, while maintaining the highest possible elasticity of the yarn throughout the dyeing process. For the highest flexible and productive rewinding, the SSM PWX-MTC offers the proper solution; regardless whether muffs, hanks, dye packages on dye tubes or coreless dye packages are to be rewound.

Besides the displayed applications, SSM provides a wide range of renowned textile machines. A detailed overview about SSM machinery and supported applications of the textile process chain can be found under Winding Solutions at [www.ssm.ch](http://www.ssm.ch)

SSM looks forward to inspiring and interesting discussions concerning open projects using their latest developments.

**About Rieter**

Rieter is the world's leading supplier of systems for short-staple fiber spinning. Based in Winterthur (Switzerland), the company develops and manufactures machinery, systems and components used to convert natural and manmade fibers and their blends into yarns. Rieter is the only supplier worldwide to cover spinning preparation processes as well as all four end spinning processes currently established on the market. With 18 manufacturing locations in ten countries, the company employs a global workforce of some 5 230, about 20% of whom are based in Switzerland. Rieter is listed on the SIX Swiss Exchange under ticker symbol RIEN. [www.rieter.com](http://www.rieter.com)

**SSM Textile Machinery**, based in Horgen (Switzerland), is a subsidiary of the Rieter Group. SSM is the world's leading supplier of precision winding machines in the fields of dyeing, weaving and sewing thread preparation and enjoys success in individual segments of filament yarn production. SSM comprises the companies SSM Schärer Schweiter Mettler AG in Horgen and subsidiaries in Italy and China. SSM is represented worldwide in all major markets. [www.ssm.ch](http://www.ssm.ch)
