1. General

The «SSM Mobile Tools» app is divided into three subject areas: Company, calculator, and terminal (see A, B, and C). The business areas, products, and locations are displayed under «SSM Insight». «SSM Calculators» offers assistance in calculating the density, weight, positions, and yarn count. And «Mobile Terminal» enables you to retrieve the production data of your factory in real time, no matter where you are.

2. Installing the app

The free app is available for both iPhone and Android. Either visit the App Store or go to Google play and look for SSM mobile tool.

Install the app on your smartphone.

3. Starting and getting to know the app

The app will first lead you to the welcome page. Press the blue Start button and follow the further selection on the «SSM Insight» company page with the sub-categories SSM, Products, and Location, which contain more information on the company and the machines (see section A).

In the footer you can now see the further subject areas «Calculator» and «Mobile Terminal». These two sections B and C are described on page 2.

All the navigation keys Back, New, Next, Go and are self-explanatory.

4. The three subject areas:

- **Company**
  - Company, products and locations

- **Calculator**
  - Calculation tool for density, positions, weight, etc.

- **Terminal**
  - Real-time checking of production data
«SSM Calculators» offers assistance in calculating the density, weight, positions, and yarn count.

**SSM Calculators**

1. **Density**
   - Package weight: grams
   - Package diameter: mm
   - Empty tube diameter: mm
   - Starting traverse length: mm
   - End traverse length: mm
   - Calculation of the winding density in g/l.

2. **Number of positions**
   - Yarn count:
   - Yarn count units: dtex, Nm, NeC, den
   - Production per day (kg):
   - Yarn count:
   - Winding speed (m/min):
   - Efficiency (%):
   - Working hours per day:
   - Calculation of the number of positions to produce the specified package weight.

3. **Weight**
   - Yarn count:
   - Yarn count units: dtex, Nm, NeC, den
   - Winding speed (m/min):
   - Efficiency (%):
   - Working hours per day:
   - Calculation of the product net weight in kg/day.

4. **Yarn count texturing**
   - Yarn count:
   - Yarn count units: dtex, Nm, NeC, den
   - CORE YARN:
   - EFFECT YARN:
   - Yarn tension:
   - After stretch:
   - Calculation of the yarn count in dtex or den.

5. **Yarn count covering**
   - Yarn count:
   - Yarn count covering:
   - Yarn count elastane:
   - Draw ratio elastane:
   - Calculation of the yarn count in dtex or den.

«Mobile Terminal» enables you to retrieve and check the production data of your factory in real time.

**Mobile Terminal**

1. **Login**
   - Email: mobileterminal@ssm.ch
   - Server: DEMO SERVER

2. **Server selection**
   - Server configuration

3. **Machine overview**
   - Status overview with current and rated values per position

4. **Statistics**
   - Logs
